

Product Support Status

Last updated: 3 April 2023

SpinetiX is committed to the design and manufacture of the highest quality solid-state media players for digital signage.

All our product models are made to work 24/7 and to last as long as possible: this protects our customers' investment and protects the environment. Our efforts to offer the best quality begin in Switzerland where our hardware and software architects design our products. To keep the highest standards of quality control we manufacture in Europe and select reliable technology from established partners.

In line with this strategy, SpinetiX has made the commercial commitment to offer to our customers a 3-year warranty on all our current hardware products. (See the [SpinetiX General Terms & Conditions of Sale](#)).

Moreover, SpinetiX provides you with all the support and services you need, to ensure that each of our products runs efficiently throughout every stage of its life cycle — from the time it's purchased until its end-of-life. Check out in the table below the status of our support on all our products:

Model	Manufacturer	Launch	Hardware Repair or Replacement	DSOS and Firmware Updates and Maintenance	Technical Support and Critical Security Updates
